

EMPLOYEE PROFILE

Shimon Jacobs

Mr. Jacobs has 14 years experience in software development, SW and System engineering. He started his career as junior programmer. His capabilities in understanding cross-system issues and his skills in system engineering brought him to **ACTL**. Since 1999 Mr. Jacobs serves as a distinguished trainer for object oriented technologies in general and UML and SW architecture in special and has coached the students in applying their skills in complex projects. **ACTL** is today the leading Israeli company in SW development methodologies.

Areas of Expertise

- UML and object oriented requirements capture, analysis and design.
- Unified Process mechanisms, templates and definition of scripts.
- Profound technical and theoretical knowledge of CASE-tools.
- Microsoft frameworks and development environment.

Professional History

1999 - today: ACTL Systems Ltd.

As a well-gifted trainer at ACTL Systems Ltd., he teaches Object Oriented Analysis and Design courses, the UML language and leads hands on workshops in many of the leading hi-tech companies in Israel (Intel, Israeli Aircraft Industries, Microsoft and others). As consultant, he trains and consults companies in Software Engineering methodologies and in the efficient use of CASE and development tools. He acts as a coach and mentor during all the development phases and takes actively part in the definition of customized development processes. He helps to choose development environments and define criteria for selecting the right CASE tool.

1997-1999: Ohel Torah Rabbinic Institute.

Responsible of defining the requirement specifications for the administration of the institute: financial, logistic and office management domains. Taking active part in the leading of the development of the different applications, their integration and customization.

Academic Credentials

Born in 1962 in Monsey, New York, talks fluently Hebrew, English and Yiddish. He is married and has a nice family. He studied Jewish Philosophy and Law at M.H of Passaic, N.J. Then started his career with a degree in System Engineering from the Machon Hacharedi L'hachshara Miktzoit. He continued with system and application degrees from Microsoft University and from Rational University.
